**Subject:** FYI - 2002 ERT Scanner Van Survey Hunters Pt attached  
**Attachments:** Rad Scanner Van Survey Rpt Sept 2002 09-156344.pdf

FYI, Thank you to ERT for the work you have done in the past. Since that time much more of the site is now paved. Almost all of Parcel B, C, G, UC-1, UC-2 are now paved. Most of Parcel E and E-2 are not paved. Parcel D-2 is a bedrock hillside. Parcel A has condos being built, and some are already occupied. A pregnant woman living there has expressed concern about exposure. I have told some members of the community about the 2002 results already done to give them reassurance that even if soil with concentrations above action levels remain on site at depth, soil and asphalt would shield tenants and surrounding communities from radiation. I gave this report to one of the activist leaders.
